Profile Summary

Software Engineer with 2+ years of experience in Java-based backend development using Core Java, JSP, Servlets, JDBC, MySQL, and AWS. Skilled in building scalable backend modules, optimizing SQL queries, and debugging production issues to improve system performance. Strong knowledge of OOP, MVC, and database-driven application design. Additionally experienced in client coordination, requirement analysis, and deployment support through prior Project Engineer responsibilities. Seeking a Java/Backend Developer role to contribute to modern, efficient, and high-performing applications.

Education

MS/M.Sc(Science), 2024

Pune University

B.Sc, 2022

Pune University

Work Experience

Jul 2023 - Dec 2025

Software Engineer

ETHDC Technologies

- Gained over 2+ year of hands-on experience in Java, JSP, Servlets, JDBC, and SQL, HTML, JavaScript development.
- Applied Object-Oriented Programming (OOP) principles and design patterns to develop scalable, maintainable, and high-performance applications.
- Managed and reviewed technical aspects of project design to ensure alignment with industry standards, coding best practices, and client requirements.
- Contributed to backend development of cloud-based applications, improving system performance and scalability through optimized algorithms and efficient database queries.
- Provided onsite technical support in Bahrain for system implementation and troubleshooting.
- Enhanced UI workflows using HTML, CSS, and JavaScript for better user experience.
- Received client appreciation for on-time implementation and successful project delivery.

Key skills

- Java
- Javascript
- Java Spring Boot
- SQL
- JDBC
- Servlets
- Objectoriented Programming (OOP)
- Html/Css
- React.js
- Python
- AWS
- C++
- C Programming Language
- Docker
- Microservices
- Rest API Development

Internship

8 Months

Java Full Stack developer

G-Soft Solutions

- Completed an internship as a Full Stack Java Developer, gaining hands-on experience in Core Java, Advanced Java, Servlets, HTML, CSS, JavaScript, MySQL, and Spring Boot.
- Designed and developed a Phonebook Directory web application featuring add, update, delete, and search (CRUD) functionality using RESTful APIs.
- Built REST APIs using Spring Boot for handling client-server communication and backend business logic.
- Implemented MySQL database integration for secure data storage, retrieval, and optimized CRUD operations using JDBC.
- Applied MVC architecture to separate presentation, business logic, and data access layers.
- Developed backend components including request-response handling, form validation, and session management.
- Collaborated on UI development to ensure seamless integration between frontend and backend components.
- Strengthened understanding of web application architecture, RESTful services, and real-world software development practices.

Projects

2 Weeks

Course Management System

Role: Java / Spring MVC Developer

Technologies: Java, Spring MVC, Spring Core, Spring JDBC, JSP, MySQL, HTML, CSS, Ajax Apache Tomcat

Developed a Spring MVC—based Course Management System to manage academic entities such as courses, subjects, and teachers. The application supports course—subject mapping, teacher registration, and course-based subject management using a layered MVC architecture.

Key Responsibilities :

- Developed a modular Spring MVC application using layered architecture (Controller, Service, DAO).
- Implemented Course and Subject Master modules with complete CRUD functionality.
- Developed course—subject mapping using relational database design in MySQL.
- Built Teacher Master module with registration and course selection features.
- Enabled subject management based on selected courses.
- Applied Spring IoC (Dependency Injection) to achieve loose coupling.
- Integrated Spring JDBC for database operations with MySQL.
- Implemented server-side validation and proper data binding.

Certification

- Java Full Stack Certification
- AWS Certified Cloud Practitioner
